

# NARROW ALUMINIUM HOOP TUNNEL KIT

## (W) 0.3M X (L) 0.9M

### CONTENTS

2	NARROW ALUMINIUM HOOP
1	900MM ALUMINIUM TUBE
2	UPRIGHT TUBE CLIP
1	COVER
12	PIPE CLIPS
10	STEEL PEGS

### ASSEMBLY PROCESS

**STEP1:** Select your starting point in your garden and insert the first hoop into the soil. Once inserted space out the next hoop, we recommend spacing around 900mm apart as this is the length of the support bar.

**STEP2:** Insert 1x upright tube clip into both ends of the 900m pole to form the support bar. Insert the support bars between the hoops.

**STEP3:** To attach the netting, lay over the top of the hoops leaving an equal overhang at both ends, enough to secure to the soil with the steel pegs. Use the pipe clips to fasten the netting to the hoops.

Please be aware the clips are a tight fit and require some applied pressure to fit in place. We recommend 4 clips per hoop, two spaced around the centre of the hoop and one on either side at the base.
